

### Investment Strategy

The Ostrica Emerging Market Debt Fund invests globally in a broad diversified portfolio of emerging market bonds in the investment and non-investment grade space. Ostrica mostly invests in government debt, but also profits from opportunities in corporate bonds. We use forward looking models to calculate the probability of default and a fair value spread of the bonds in Ostrica's universe. ETFs are being used for tactical asset allocation purposes: active duration management, active spread management & active management of liquidity premia. Using these principles of strong risk management, the fund provides a very stable investment in emerging market debt.

### Asset Allocation

### Top 10 Holdings

	Portfolio Weighting %
