

Ostrica Equities Emerging Markets Fund

Investment Strategy

The Ostrica Equities Emerging Markets Fund invests globally in stocks in emerging markets, predominantly in the Asia, Emerging Europe and Latin America. In addition, we can invest in companies in developed markets that get at least 50% of their revenue from emerging markets. The investment strategy is twofold: we manage a portfolio of stocks using a quant based multi-factor model and we run a futures overlay strategy using momentum and volatility models derived from futures trading models to protect the portfolio from heavy losses on world equity markets. Making use of the newest technology, smart algorithms and big data, we create outperforming equity portfolios with downside risk protection. This means our portfolio is hedged in falling markets and leveraged in soaring markets. To create a hedged position for protection, we sell equity and currency futures contracts on emerging markets equity indices and currencies.
